

# NON DESTRUCTIVE TESTING

# NDT (Non Destructive Test)

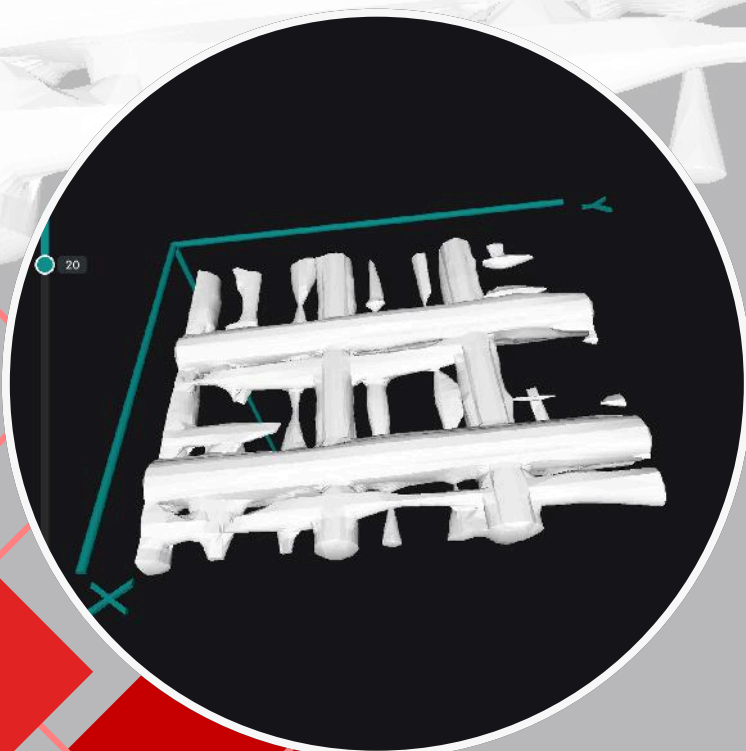

At Civilab, we specialize in advanced, Non Destructive Testing solutions to support you during construction, renovation or maintenance projects. Utilising state-of-the-art Ground Penetrating Radar (GPR) technology, we accurately detect and map subsurface features such as underground utilities, rebar, post-tension cables, and voids within concrete structures.

Our methods ensure minimal disruption to your site while providing precise data critical for informed decision-making.

We partner with you to enhance safety, prevent costly errors, and streamline project planning. By identifying potential hazards before they become issues, we help safeguard your project's integrity and timeline.

Whether you're embarking on a new construction project or assessing existing structures, our professional scanning services are customised to meet your specific needs.

Trust Civilab to deliver reliable, efficient, and accurate scanning solutions that support the success of your projects. Contact us today to learn how we can assist you in achieving your project goals.

# INNOVATION AND QUALITY

**Civilab is set up for the following NDT tests:**

- Concrete Scanning
- Area Scans
- 3D Scanning
- Rebar Scanning & Surveys
- Concrete Column, Beam & Floor Scanning
- Post Tension Scanning
- Schmidt Hammer Test
- Ultra Pulse Velocity Test

**Committed to Development of African Continent**
